**Bowdoin Completes Dedham
Ophthalmic Consultants & Surgeons**

Dedham, Massachusetts - Bowdoin Construction recently completed the interior fitout of this state-of-the-art ophthalmology care center in Dedham, Massachusetts. The facility, designed by Hardaway Associates Architects, required selective demolition, new MEP systems and HVAC upgrades. The newly completed facility features eleven exam rooms, procedure rooms, testing rooms, a workshop and offices for the doctors and staff. The space also includes an optical shop for clients to select the latest in eyewear.

This project is the second consecutive medical space that Bowdoin has built for this client. Prior to this, Bowdoin built their laser eye surgery center, Surgisite Boston, in Waltham, Massachusetts.

Owner's comments: "As a result of my experience with Bowdoin Construction at Surgisite, we selected your company to build our new office... Our faith in Bowdoin was rewarded: Your crew finished the job ahead of schedule and under budget. My partner and I are ecstatic over the end result."
