Bowdoin and Hardaway Associates Complete the ENT Center of Rhode Island

Warwick, Rhode Island - Bowdoin Construction and Hardaway Associates recently completed the new 16,000 s.f. physician's operatory center in Warwick, Rhode Island.

Bowdoin worked in conjunction with ENT Center of Rhode Island and Hardaway Associates Architects throughout the design and construction process providing progress budgets and a fast-track construction approach.

The scope of the work entailed extensive selective demolition of an existing building including gutting the interior and stripping off the existing building skin. New construction included all new roofing, brick and precast facade, new windows, new MEP/FP systems, medical gas piping, and all interiors for this specialty outpatient center focused on otolaryngology procedures.

Providing Creative Solutions for your Building Needs
