**Bowdoin Construction Breaks Ground
for Elder Services PACE Facility**

Boston, MA - Bowdoin recently broke ground for the renovation and expansion of Elder Services' new facility on the Dorchester/Mattapan line. The project, Designed by Melton-Ferre Associates, consists of renovating the existing 32,000 s.f. building including new windows, a new roof, all new interior finishes and upgrading the existing elevators. The facility will also receive three separate additions totaling 8,000 s.f., which will include a new canopy/drive-thru area, new handicap entrances and additional support space. When complete, the new facility will feature staff offices and conference rooms, four exam rooms, five treatment rooms, day rooms, activity rooms, dementia rooms and rehabilitation rooms. The facility will also receive all new MEP/FP systems and extensive sitework and landscaping.

Elder Services utilizes The Program of All-Inclusive Care for the Elderly (PACE) which addresses the needs of long-term care clients, providers and payers. The comprehensive PACE service program allows the patients to continue living at home while receiving services, rather than be institutionalized.

Bowdoin Construction is one of the New England region's leading construction management and general contracting firms focused on providing a solutions based approach to each of our client's specific building needs.
