Bowdoin Completes The Ulysses G. Shelton Head Start Center

Brockton, Massachusetts - Bowdoin recently completed a 14,000 s.f. classroom addition to the Ulysses G. Shelton Head Start Center in Brockton, MA. The new space, designed by Fine Associates, was constructed of structural steel with a brick facade and features nine classrooms, a large meeting room, staff and reception offices, an entrance vestibule, restrooms and space for storage and utilities. The project also involved landscaping, stone slope stabilization, reorientation of parking areas and a new playground. The existing facility remained fully operational during construction, and close attention was paid to safety and overall project coordination.

Self Help, Inc. is a community action agency established in 1965 to insure that opportunities are available for all residents to obtain health services, education, housing, employment, financial stability, and to participate in community planning. The Head Start Program provides a comprehensive developmental service for low-income, pre-school children and also provides social services for their families.

Bowdoin Construction is one of the New England region's leading construction management and general contracting firms focused on providing a solutions based approach to each of our client's specific building needs.
