

Bowdoin Wins ABC EIC Award

Weston, MA – Bowdoin Construction Corp. was recently awarded an ABC Merit Award, representing work that stands above the rest, for its work on The Revers Center for Science and Visual Arts at The Rivers School in Weston.

The Merit Award recognizes the overall excellence in project execution, craftsmanship, safety, innovative elements and challenges, and client satisfaction.

Construction of the 34,000sf academic building took place over the course of 15 months, opening its doors to students in January 2020. Bowdoin's proactive use of building information modeling (BIM) throughout the project uncovered several coordination issues that were able to be mitigated prior to installing mechanical ductwork and piping in the field, which saved time and money.

Living wall in lobby

A key feature of the project is the main entrance stair found in the front lobby. This was designed to hang from the ceiling off a single, 2-inch square rod. This building element was incorporated to tie in with the school's engineering program, demonstrating the important principals of physics, and highlights the overall educational purpose of the Revers Center.

The Revers Center for Science and Visual Arts

Designed by Dario Designs, the state-of-the-art Revers Center prominently demonstrates the Rivers Schools' commitment to academic excellence, and to providing students with superior innovative and experiential learning opportunities.

According to Bowdoin president, Irwin Yanowitz, "Projects of this nature are particularly gratifying to be a part of, realizing the positive impact your time and efforts can have on a learning community."

TFMoran Receives Gold Awards

Bedford, NH – TFMoran was recognized by The Registry Review, New Hampshire's Statewide Real Estate and Financial Newspaper, as a Gold-rating recipient in its first "Best of 2020" readers' survey.

Announced in January, TFMoran was voted the Gold winner for Best Engineering Firm, and the Gold winner for Best Landscape Architect in the Commercial Real Estate category.

The statewide newspaper is published by The Warren Group. The Registry Review's readers cast their votes online

for the best providers of services and goods in the real estate and banking industries. The poll was put together to measure the loyalty and satisfaction of readers, providing them with an opportunity to speak up for those they believe are the best.

PWC CT Awards Four

Hartford, CT – The Professional Women in Construction Connecticut Chapter (PWC CT) recently honored four women with professional achievement awards for their outstanding contributions to the architecture, engineering and construction (AEC) industry.

Catherine Ellithrope, associate principal at the S/L/A/M Collaborative, was honored with the Women of Achievement Award. She has been an active member in the AEC industry, providing expertise in both public education and corporate architecture since 1994.

Jackie Quesada, LEED AP, national healthcare industry coordinator at Whiting-Turner, received the Rising Star Award. She has reached a national role where she works directly with management and project leaders across the country.

The Excellence in Mentoring Award was given to Taylor Gladding, project manager for Gilbane Building Company, for her work and dedication to promoting mentorship within the AEC industry. She has championed Gilbane's Connecticut office summer internship program.
